

Checklist Item	Score (Pass/Fail)	Notes / Comments
Room Allocation Page Opens	Pass	Class booking page opens successfully
Room Information Display	Pass	Class and room information displayed correctly
Class Timetable Link	Pass	Timetable page works correctly
Weekly Room Timetable	Pass	Weekly class schedule displayed correctly
Social Media Link	Pass	Social media links open correctly
Booking Form	Pass	Students can book classes successfully
Readable Fonts	Pass	Fonts are clear and easy to read
Color Contrast	Pass	Good contrast between text and background
Easy Navigation	Pass	Users can navigate between pages easily
Clear Labels	Pass	Buttons and form fields are clearly labeled
Validation Messages	Pass	Error messages appear when invalid data is entered
Booking Form Validation	Pass	The system validates required fields correctly

□

Additional Information

The College Class Booking System allows students to book available classes .1 and view their schedules online

The system helps administrators manage class bookings, student information, .2 and classroom availability

□

Test ID	Part of System	What is being tested	Test Data	Expected Results	Actual Result	Pass/Fail
001	Performance	Page loading time	Initial click to page load	Page loads within a few seconds	Page loaded successfully within acceptable time	Pass
002	Database	Add data to database	Submit valid booking data	Booking information is saved in the database	Data saved successfully in the database	Pass
003	Booking	Date	Select a valid	Selected date is	Date accepted	Pass

	Form	selection	booking date	accepted by the system	successfully	
004	Booking Form	Course details entry	Enter course name and details	Course details are stored correctly	Course details entered successfully	Pass
005	Booking Form	Data submission speed	Submit booking form	Booking is processed quickly	Form submitted without delay	Pass
006	Form Validation	Empty input fields	Leave required fields blank	Error message is displayed	Error message displayed correctly	Pass
007	Time Validation	Time validation	Enter valid and invalid booking times	Only valid times are accepted	Invalid times rejected, valid times accepted	Pass
008	Database Integrity	Duplicate class booking	Submit duplicate booking	System prevents duplicate booking	Duplicate booking blocked successfully	Pass
009	Booking Query	Display bookings by class	Search for a specific class	Relevant bookings are displayed	Correct bookings displayed	Pass
010	Class Query	Display students in a class	Select a class	Students enrolled in the class are shown	Student list displayed correctly	Pass
011	Applet Animation	Run animation	Start animation	Animation runs smoothly	Animation worked correctly	Pass
012	Java Applet	Booking warning message	Submit incomplete booking	Warning message appears	Warning displayed successfully	Pass
013	System Stability	Overall system testing	Continuous use of system	System works without errors	System remained stable	Pass

Slide 1: Title Page

Room Booking System

اسمك : **Prepared by**
Course: ITSWD
Instructor : اسم الدكتور
Date: June 2026

الصورة: شعار الكلية أو لقطة من الصفحة الرئيسية.

Slide 2: Project Overview

Introduction

The Room Booking System is a web application designed to help students and staff book classrooms and laboratories efficiently

Purpose

.Manage room reservations
.Store booking information
.Prevent booking conflicts

الصورة: الصفحة الرئيسية (Home Page)

Slide 3: Room Allocation Page

Room Information

:The system displays available rooms with their details

Room Number
Capacity
Building Location
Availability Status

Example Rooms

Room 101 – Computer Lab
Room 201 – Lecture Theatre
Room 301 – Science Lab

الصورة: صفحة Room Allocation

Slide 4: Booking Form

Booking Process

:Users enter

Booking ID
Guest ID * Tutor Name
Room Number * Room Number
Booking Date * Booking Date
Check-in Time * Submit Booking
Check-out Time

.The data is then submitted to the system

الصورة: صفحة Booking Form

Slide 5: Database (MySQL)

Database Storage

.All booking information is stored in a MySQL database

Stored Data

Booking ID * id
Guest ID * tutor_name
Room Number * room_name
Date * booking_date
Time

الصورة: phpMyAdmin ويظهر جدول الحجوزات.

Slide 6: Java Applet

Java Applet Function

:The Java Applet displays

Booking notifications
Warning messages
Simple animation

.This improves user interaction

الصورة: رسالة ال Applet أو شاشة تشغيل.

```
import java.applet.Applet; // Imports the Applet class to create an Applet program
import java.awt.*; // Imports graphics, colors, and font classes
```

```
public class RoomBookingApplet extends Applet implements Runnable { // Creates the RoomBookingApplet
class
```

```
String message = "Sorry, Room 101 is already booked."; // Message displayed to the user
int y = 50; // Vertical position of the message
boolean down = true; // Controls the movement direction
```

```
public void start() { // Called automatically when the Applet starts
Thread t = new Thread(this); // Creates a new thread
t.start(); // Starts the thread
}
```

```
public void run() { // Thread execution method
while (true) { // Infinite loop for continuous animation
```

```
if (down) // If moving downward
y += 2; // Move text down by 2 pixels
else // Otherwise
y -= 2; // Move text up by 2 pixels
```

```
if (y >= 80) // If the text reaches the lower limit
down = false; // Change direction to upward
```

```
if (y <= 40) // If the text reaches the upper limit
down = true; // Change direction to downward
```

```
repaint(); // Redraw the Applet with the new position
```

```
} try
```

```
Thread.sleep(50); // Pause for 50 milliseconds
catch (Exception e) { // Handles any possible exception {
{
{
{

public void paint(Graphics g) { // Paint method used for drawing

g.setColor(Color.BLACK); // Sets the drawing color to black
g.setFont(new Font("Arial", Font.BOLD, 22)); // Sets the font style and size
g.drawString("Room Booking System", 80, 25); // Draws the title

g.setColor(Color.RED); // Changes color to red
g.setFont(new Font("Arial", Font.BOLD, 18)); // Sets font for the message
g.drawString(message, 20, y); // Draws the moving message

g.setColor(Color.BLUE); // Changes color to blue
g.drawString("Status: Booked", 20, 120); // Displays the room status
{
{
{
```
